

Bc. Jakub Nezval

* 20. 9. 2001, he/him

Education

2025 – Bachelor's degree

Masaryk University,
Faculty of Informatics

Field of study:

Programming and
application development

Programming

Experienced with:

- Python
- Java
- C#
- HTML & CSS
- TypeScript
 - React
- SQL
- git

Basic knowledge of:

- C
- C++
- Rust
- Haskell
- JavaScript
 - p5.js

Languages

- Czech: Native
- English: B2/C1
- German: A1

About Me

I'm a developer and I want to work on projects that make sense. I thrive in organized environments with clear rules and goals.

I consider myself a creative being with perfectionism tendencies. My hobbies include drawing (traditionally and digitally), simple vector graphics, pixel graphics and playing board and video games.

I'm slightly introverted, but I don't struggle with communication.

Experience

University

I worked on multiple team projects, including teams with international students. I was a team leader on a few occasions as well.

Kyndryl Client Centre

Senior Associate, IT Solutions (part-time) 2024-02-01 – NOW

I was involved in various tasks – across whole tech stack.

For example, database migration, Java application migration, fixing various bugs, mitigating security vulnerabilities, and application maintenance.

Intern 2023-09-06 – 2024-01-31

I was initially tasked with visualisation, but because the priorities shifted, I ended up refactoring React front-end.
